

Hi, everyone.

Please join us for a kick-off call to discuss how the U of M should implement a new prohibition on the use of certain Chinese-manufactured telecom and surveillance equipment in our systems. (Memo with details attached.)

Thanks! And, of course, please don't hesitate to contact me with any questions.

Raechelle,

The memo is public, and you can certainly share it with them.

And we're a public institution, so they can come visit anytime they want — indeed, if faculty want to work with them on topics of joint interest, that's fine too.

But we won't take money from them in any form, or enter into other contractual agreements on the part of the University.

Best,

Chris
